

PRINCE SUKHWAT

Robotics Trainer | Embedded Developer | Home Automation Expert

Robotics trainer and embedded developer with over five years of hands-on work across home automation, industrial automation and robotics. Led Gorgeous Home Automation for three years, building and selling smart-home and water level control products, and now trains students in robotics at NIMO Labs India. Has built 35+ working projects — from an AI humanoid receptionist robot to a fully automatic bottle filling line.

Experience

NIMO Labs India Pvt Ltd

May 2024 – Present

Robotics Trainer · Udaipur

CURRENT

- Run robotics classes and hands-on workshops covering Arduino, microcontrollers, sensors and IoT.
- Built **Nikki**, an AI humanoid receptionist robot that wakes on its name, understands visitors' questions and answers by voice (Raspberry Pi, speech-to-text, LLM, text-to-speech).

Gorgeous Home Automation

Mar 2021 – May 2024

Director · Bhilwara

- Led the business end to end: product design, installation and customer support for smart-home automation.
- Designed the **PRI101 automatic water level controller** with tank-level indication, motor status, sensor inputs and a manual bypass switch.
- Delivered home automation that controls lights, fans, AC and door locks from a mobile app in real time.

Key projects

Humanoid Robot — Nikki

AI | Robotics | HRI

Voice-driven receptionist robot with LED face and touch display that greets and answers visitors.

Automatic Bottle Filling System

Automation | PLC | Sensors

Conveyor line with valve-controlled filling, a robotic arm for handling and an automatic capping station.

Water Level Controller (PRI101)

Automation | IoT | Embedded

Commercial controller that runs the pump automatically from high and low tank levels.

4

Industrial Robotic Arm

Control | Kinematics | Embedded

Multi-axis arm programmed for pick-and-place tasks.

5

Full Home Automation

IoT | App Control | Real-time

Phone-app control of lights, fans, AC and locks across a home.

6

User Interactive System

UI/UX | Monitoring | Control

Software dashboard for live sensor monitoring and device control.
